Feet thump up the entry stairs, and the floorboards creak under new weight. Lamps come on in the spitting, the dog seems to be saying, Teeth? You want teeth? Take a look at THESE teeth, go. The Ring modules contained all of the kinds of living, working, recreational, manufacturing, and agricultural facilities pioneered in the development of space colonies, and by the time the ship was closing in on Alpha Centauri, accommodated some thirty thousand people. With the communications round-trip delay to Earth now nine years, the community was fully autonomous in all its affairs --a self-governing, self-sufficient society. It included its own Military, and since the mission planners had been obliged to take every conceivable circumstance and scenario into account, the Military had come prepared for anything; there could be no sending for reinforcements if they got into trouble.. "The mediocre shall inherit the Earth," Kalens had told his wife, Celia, after returning to their Delaware mansion from a series of talks with European foreign ministers one day in 2055. "Or else, eventually, there will be another war." And so the Kalenses had departed to see the building of a new society far away that would be inspired by the lessons of the past without being hampered by any of its disruptive legacies. There would be no tradition of unrealistic expectations to contend with, no foreign rivalries to make concessions to, and no clamoring masses accumulated in their useless billions to be kept occupied. Chiron would be a clean' canvas, unspoiled and 'unsullied, awaiting, the fresh imprint of Kalens's design.. The mention of antimatter reminded Colman of something. He sat back on the sofa and cast his mind back as he tried to pinpoint what. It reminded him of something Kath had said. The others stopped talking and looked at him curiously. And then it came to him. He cocked his head to one side and looked at Bernard. "Did you know that Chironians were modifying the Kuan-yin into an antimatter ship?" he asked.. "What does a Chironian computer print when you attempt illegal access?" one of them asked Colman when they had got into their joke repertoires.. CELIA KALENS STRAIGHTENED the kimono-styled black-silk top over her gold lamé evening dress, then sat back while a white-jacketed steward cleared the dinner dishes from the table. It's all unreal, she told herself again as she looked around her at the interior of Matthew Stern's lavish residential suite. Its preponderance of brown leather, polished wood with dull metal, shag rugs, and restrained colors combined with the shelves of bound volumes visible in the study to project an atmosphere of distinguished masculine opulence. She had contacted him to say that she needed to talk with him privately--no more--and within minutes he had suggested dinner for two in his suite as, "unquestionably private, and decidedly more agreeable than the alternatives that come to mind." The quiet but compelling forcefulness of his manner had made it impossible somehow for her to do anything but agree. She told Howard that she was returning to the ship for a night out with Veronica, who was celebrating her divorce--which at last was true. Though Veronica was celebrating it in Franklin with Casey and his twin brother, she had agreed to confirm Celia's alibi if anybody should ask. So here Celia was, and even more to her own surprise, dressed for the occasion.. above her, in the open doorway, and even in this poor light, Leilani could see that they both still looked. The girl forked up another mouthful of pie, and again she chewed with a stoic expression that suggested.. born?". one of them echoed back in memory. The girl had asked if Micky believed in life after death, and when. "You've got your father's name," Geneva said hopefully. "If he could be found . . .". He's in a large commercial kitchen with a white-ceramic-tile floor. Banks of large ovens, cooktops.. because everyone fears that these two are federal immigration agents, rousting illegal aliens? of which. The unpacking was finished, and Jean would know better where she wanted to stow the few things he had left lying out. The move had gone very quickly and smoothly, mainly because the Chironians had even furnished the place--right down to the towels and the bed linen, which had meant that the Failowses could leave most of their own things in storage at the base until something more permanent was worked out.. "We could probably arrange a visit for you too," Chang offered. "There's a large fusion complex along the coast that supplies power and all kinds of industrial materials for most-- of Franklin. Another one's due to be built soon, and they'll be needing people too. I could arrange for you to go and see it, if you think you'd be interested..". With only a wistful expression, Rickster said that being able to turn yourself loose, whenever you wanted. Colman lifted his head and stared again out over the impossible approaches to the bulkhead lock, picturing once more the inevitable carnage that a frontal assault would entail. Who on either side would stand to gain anything that mattered to them? He had no quarrel with the people manning those defenses, and they had no quarrel with him or any of his men. So why was- he lying here with a gun, trying to figure out the best way to kill them? Because they were in there with guns and had probably spent a lot of time figuring out the best way to kill him. None of them knew why they were doing it. It was simply that it had always been done.. beach all the tiny chips of broken seashells, worn to polished flakes by ages of relentless tides, and.. empty skull? or taken away in an extraterrestrial starship, like Lukipela, and hauled off to some
