Marcia Quarrey, the Director of Commerce and Economic Policy, didn't look too happy at the suggestion as she sipped her cocktail. "Obviously that would be possible," she said, setting down her glass. "But would it serve any useful purpose? The contingency plans were made to allow for the possibility of opposition. Well, there hasn't been any opposition. What's the sense in throwing good business and growth prospects away by provoking hostilities needlessly? We can acquire Franklin simply by walking in. We don't have to make a demonstration out of it." On their arrival, they learned from Maddock that there was little need for them to have bothered making the arrangements with Sirocco. Border security around Phoenix was disintegrating, with most of the SDs being pulled back to protect the shuttle base, the barracks, and other key points, and the regular troops who were left scattered thinly along the perimeter doing little to interfere with the civilian exodus. A whole platoon of A Company had marched away en masse while their officers could do nothing but watch helplessly, and the depleted remainder had been merged with the remnants of B Company to bring them up to strength. More SDs were disappearing too. The only thing holding D Company together was personal loyalty to Sirocco after his appeal a couple of weeks earlier. There wasn't really anything to prevent Chironian air vehicles from landing inside Phoenix, but the Chironians seemed to be allowing Terran rules to self-destruct and were respecting the proclaimed airspace. Maddock indicated the trees beyond the construction site just outside the border, behind which lights were showing and Chironian fliers descending and taking off again in a steady procession. "No need for you to walk very far," he told them. "I can call Kath and have her send a cab over. What's her number?"..you've assessed the situation..but the whole strange story is out there if you want to look it up. As for me, I'd rather eat pie, talk about." The longer he eludes that savage crew, the fainter his trail becomes? or at least this is. The party arrived at the little-used connecting passage running behind the Françoise and its neighboring establishments, and the soldiers waited among the shadows of the surrounding entrances and stairways while Lechat tapped lightly on the rear door of the restaurant. After a few seconds the door opened and Lechat disappeared inside. Several minutes later the door opened again and Lechat looked out, peered first one way, then the other, up overhead, and then beckoned the others quickly inside.. "Have you thought about it?" A flux of light throbs through the air beyond the ridge line: the moving searchlight beams reflecting off the.. "If I could, I'd make you normal just like Ms. Donella and me." January 8, 2081. Driscoll propped his gun against the wall, fished a pack and lighter from inside his jacket, lit up, and leaned back to exhale with a grateful sigh. The irritability that he had been feeling wafted away with the smoke. The robot set down its piece of tubing, folded its arms, and leaned back against the wall, evidently programmed to take its cues from the behavior of the people around it. Driscoll looked at it with a new curiosity. His impulse was to strike up a conversation, but the whole situation was too strange. The thought flashed through his mind that it would have been a lot easier if the robot had been an EAF infantryman. Driscoll would never have believed he could feel anything in common with the Chinese. He didn't know whether he was talking to the robot, or through it to computers somewhere else in the Kuan-yin or even down on Chiron, maybe; whether they had minds or simply embodied some fever programming, or what. He had talked to Colman about machine intelligence once. Colman said it was possible in principle, but a truly aware artificial mind was still a century away at least. Surely the Chironians couldn't have advanced that much. "What kind of a machine are you?" he asked, "I mean, can you think like a person? Do you know who you are?"..ninny! It's a pet-shop snake. You should've seen the look on your face!"..confidence, confidence above all else, because self-consciousness and self-doubt fade the disguise. He..was us."

-In the Political Science course at school, the Mayflower II's primary mission had been described as one of "preemptive liberation," which meant that because the Asiatics and the Europeans were the way they were, they would seize Chiron and convert it to their own corrupt ways if given the chance, and the Mayflower I1 therefore had two years to teach the Chironians how to protect themselves. There were other, more abstract reasons why it was so important for these Chironians to be educated and enlightened, which Jay didn't fully understand, but which he accepted as being among the many mysteries that would doubtless reveal themselves in their own good time as part of the complicated business of growing up..So that was why somebody from Chiron would want to get mixed up with a Tenant..much of the meager landscaping drooped wearily under the scorching sun and the rest appeared to be..Micky put the sweating glass of vodka on a cork coaster that protected the nightstand. "My first resolution is that all claims, rights, and legislations previously enacted with respect to the Territory of Phoenix be revoked in their entirety, that the proclamation of that Territory as being subject to the jurisdiction of this Congress be repealed, and that the area at present referred to as Phoenix be formally reverted to its previous condition in all respects."..her brain. Micky was better than

that. Yeah, sure, all right, Micky did indeed harbor the tendency to. What had changed was hope: the hope of change, which had seemed impossible to her only yesterday, to be entrusted to the masses. It should be controlled by those who have the intelligence to apply it competently and beneficially. Gaultitz would be a suitable figure to groom as a... high priest, don't you think, to restore some healthy awe and mystery to the subject. He nodded knowingly. "The Ancient Egyptians had the right idea." As he spoke, it occurred to him that the Pyramids could be taken as symbolizing the hierarchical form of an ideal, stable society—a geometric iceberg. The analogy was an interesting one. It would make a good point to bring up at the dinner party. Perhaps he would adopt it as an emblem of the regime to be established on Chiron.
