But Lesley was not listening as he gazed down at the platform below, which fanned outward from the arc lights above the lock to become indistinct in the darkness of the antechamber. Figures - were moving slowly from the shadows by the transit tubes and freight rails, spread thinly at the back, but closing up as they converged with the lines of the platform. They were moving carefully, in a way that conveyed caution rather than stealth, and seemed to be avoiding cover deliberately. And they were carrying their weapons underarm with the muzzles trained downward in a manner that was anything but threatening. For a few seconds Bernard and lay were too stunned to say anything. "But... that's crazy," Bernard protested at last. "You can't just let everybody go round shooting anyone they don't like." At the end of 1979, Hogan opted to write full-time. He is now living in northern California. "Therefore? Micky." Three obstacles now remained between Kalens and the vision that he had nurtured through the years of presiding over the kind of neofeudal order that would epitomize his ideal social model. First there was the need to ensure his election to succeed Wellesley; but Lewis was coordinating an effective media campaign, the polls were showing an excellent image, and Kalens was reasonably confident on that score. Second was the question of the Chironians. Although he would have preferred Borstein's direct, no nonsense approach, Kalens was forced to concede that after six years of Wellesley's moderation, public opinion aboard the Mayflower II would demand the adoption of a more diplomatic tack at the outset. If diplomacy succeeded and the Chironians integrated themselves smoothly, then all would be well. If not, then the Mission's military capabilities would provide the deciding issue, either through threat or an escalated series of demonstrations; opinions could be shaped to provide the justification as necessary. Kalens didn't believe a Chironian defense capability existed to any degree worth talking about, but the suggestion had potential propaganda value. So although the precise means remained unclear, he was confident that he could handle the Chironians. Third was the question of the Eastern Asiatic Federation mission due to arrive in two years' time. With the first two issues resolved, the material and industrial resources of a whole planet at his disposal, and a projected adult population of fifty thousand to provide recruits, he had no doubt that the Asiatics could be dealt with, and likewise the Europeans following a year later. And then he would be free to sever Chiron's ties to Earth completely. He hadn't confided that, part of the dream to anyone, not even Celia. Now, in the Utah night, he sits boldly in the Explorer and sings along with the catchy music on the radio, evening. She must have left before it happened." "We heard you could use some help, chief," Driscoll announced. "Couldn't leave it all to the amateurs?" Ribald comments and hoots of derision greeted the remark. And none of it was going to change--ever. Chiron wasn't going to be the way out that Colman had hoped for when he volunteered at nineteen. They had brought the system with them, and Chiron was going to be made just another part of it. Colman sighed. "It's not anything like that. It's just--" Anita waved a hand in front of her face. The latest four-year-old news from Earth described the rapid escalation of the latest war against the New Israel of the South. Only this time the EAF was getting involved. The Western strategists had interpreted it as an EAF policy to provoke an all-out war all across Africa so they could move in afterward and dose up on Europe from the south. Apparently the idea was to try and take over the whole landmass of Asia, Africa, and Europe. Why did they want to take over the whole of Asia, Africa, and Europe? Colman didn't know. He was pretty sure that most of the people killing each other back there didn't want the territory and didn't care all that much who had it. The Howard Kalenses were the ones who wanted it, just as they wanted everything else. Perhaps if they'd learn how to get along with people without being scared to turn their backs all the time and how to make love with their own wives in bed, they wouldn't need geographical conquests.
